SPACE CLUB OF INDIA × Google Developer Group Indore DevFest इंदौर 2026

PRESS RELEASE

Space Club of India announces collaboration with GDG Indore for DevFest 2026

Bringing India's space technology, AI and developer communities together

NEW DELHI AND INDORE — 23 OCTOBER 2026

Event	DevFest Indore 2026 · Theme: Space
Date	28 November 2026
Venue	Essentia Luxury Hotel, Indore
Organised by	Google Developer Group (GDG) Indore, with Space Club of India

New Delhi and Indore, 23 October 2026. Space Club of India and Google Developer Group (GDG) Indore will work together on DevFest Indore 2026. The collaboration connects India's growing space technology community with developers, AI practitioners, startups, colleges and young technology professionals.

More private companies and new ideas are entering India's space sector every year. DevFest Indore 2026 will show students, developers and founders the opportunities where space technology meets artificial intelligence, robotics and physical AI.

The day will include talks by experts, industry panels, student activities, time to meet institutions, and a dedicated Space Club of India presence at the event.

What the collaboration covers

Space technology and AI. How AI is used in satellite systems, space exploration, robotics and the study of space data.

Industry leaders and experts. Space technology professionals, AI experts, technology leaders and founders discuss India's growing space economy.

Students and developers. An introduction to careers, startups and innovation programmes in the space sector.

Colleges and universities. A link to Space Club of India campus chapters, mentoring and space education programmes.

The Space Club of India community. A chance to learn about the club's membership and national programmes, and how to take part.

Space Club of India and GDG Indore will also look at working together beyond DevFest 2026, through campus programmes, workshops, community projects and partnerships with institutions.

About the organisations

Space Club of India is a public charitable trust based in New Delhi. It was founded by Lt Gen PJS Pannu (Retd.) and Sandeep Unnithan. The club brings together government, industry, academia, entrepreneurs and citizens to build India's space culture and capability. Its mission is to inspire the next generation of space pioneers, and to help young Indians build careers, research and companies in space.

GDG Indore is a community of developers that connects technology enthusiasts, professionals, students and innovators through knowledge sharing, networking and community events. DevFest Indore 2026 brings people together around AI, space technology, physical AI and new technology.
